

WORK EXPERIENCE

- **Junior Product Owner** 2024-06 → Present
Danieli Automation S.p.A., Buttrio (Udine), ITA
Working in the Energy & Sustainability team, I collaborate with internal and external stakeholders to identify market needs in the area of energy management for large energy-intensive facilities so that the company's EMS product responds to these needs in a timely and effective manner. I also interface with the external development team to prioritize work, monitor development, and act accordingly.
- **Data Engineer** 2022-06 → 2024-05
SMS Group S.p.A., Tarcento (Udine), ITA
I have been working on the design and development of long-term storage systems for industrial processes data. The solutions included data pipelines to retrieve data from process control databases and store them into relational data warehouses and time series databases. BI tools connected to these structures for analysis and reporting purposes.
- **Data Scientist Intern** 2021-10 → 2022-01
Danieli Automation S.p.A., Buttrio (Udine), ITA
I have experimented Computer Vision techniques for the development and evaluation of a *Multiclass Object Detection* system for the recognition of handwritten annotations on casting products, using *state-of-the-art* Deep Learning models.

EDUCATION

- **Master's Degree Course in *Data Science and Scientific Computing*** 2022-10 → Present
University of Trieste, Trieste, ITA EQF 7
I am attending the *Artificial Intelligence and Machine Learning* curriculum of the *Data Science and Scientific Computing* Master's course. I successfully passed exams on Advanced Programming and Algorithmic Design, Data Management for Big Data, Introduction to Machine Learning, Data Visualization and Information Retrieval, Probabilistic Machine Learning, Reinforcement Learning and Statistical Methods for Data Science. My current average grade is 29/30.
- **Bachelor's Degree in *Internet of Things, Big Data & Web*** 2017-10 → 2022-03
University of Udine, Udine, ITA [96/110] EQF 6
The course focused on technologies, tools and methodologies that characterize the fields of Big Data and Machine Learning, but was organized to give also solid theoretical basis of Mathematics, Statistics and Computer Science.
During my studies, I also served from 2019-01 to 2021-09 as the student representative in the university's *Nucleus of evaluation*. My main role was to analyze data from all courses of study, identifying those with some type of problems.

PROGRAMMING SKILLS

Languages: Python, R, SQL, Typescript

Technologies: Linux, Git, Docker

Technical projects: A list of my coding projects is publicly available on GitHub at <https://www.github.com/enstit>. Projects I am particularly proud of are: $\diamond$ *YOHO24*: a neural network model for Audio Segmentation and Sound Event Detection tasks; $\diamond$ *Steflix*: a Recommender System project; $\diamond$ *Racetrack*: a Temporal Difference Learning study;

OTHER INTERESTS

- **Machine Learning and Algorithms courses:** I have attended *Kaggle.com* Data Science free courses including those on Data Visualization, Deep Learning, Computer Vision, Geospatial Analysis and Natural Language Processing, and some of the *HackerRank.com* Algorithms and Programming courses.
- **L^AT_EX typesetting:** I use L^AT_EX for writing presentations, essays and letters. Even this document is written in L^AT_EX.

LANGUAGES

Italian: Mother tongue

English: IELTS General Training 7.0¹

¹The 7.0 IELTS level is equivalent to the C1 CEFR level. Further information can be found at <https://enst.it/uUCF>.
I hereby authorize the processing of my personal data according to the 2016/679 European Union regulation (*GDPR*).
Dates and times are formatted following the ISO-8601 notation (*YYYY-MM-DDThh:mm:ss* format).
Last update on 2025-05-26T18:45:04Z. An always-up-to-date version of this document is available at <https://enst.it/cv>.
